

Achievements: registry

- Stable deployment in the cloud: no downtime
- Code recovered, transferred to VAMDC repo

Achievements: species DB

- Now updated daily
- Aggregates species from all nodes
- Browseable: <http://species.vamdc.eu/>
- Web API available for query

Achievements: query store

- Metadata store, recording all queries to nodes
- Supports authors & editors
- Allows recovery of data citations
- May also allow citable storage of data
- Fulfills VAMDC's data-citation obligations
- Prototype in operation at present

Issues with data and infrastructure

- Data correctness issues: 7 reports
- Evolution of standards: 3 requests
- Documentation upgrades: 1 request
- Ergonomics problems: 1 report
- Performance problems: 2 reports
- Missing/broken node: 4 reports
- Registry problem: 1 report
- Display & portal problems: 2 reports
- See Redmine for on-going issues

To do

- Registry: improve code for maintainability
 - G. Rixon to start; review later in 2017
- Query store: complete implementation
 - C. M. Zwolf & N. Moreau; release mid-2017?
- Fix correctness issues in nodes

To do (2)

- Web-site to list data-collections
 - Addendum to registry of VAMDC nodes
 - Pending approval by BoD
- VAMDC SLAP services
 - Service-per-node or one service for all nodes
 - BoD still to approve
